

BRANTLEY WYCHE

West Orange, NJ 07052 | (862) 766-0523 | brantleywyche24@gmail.com

TECHNICAL SKILLS

Proficient: TypeScript, JavaScript, Angular, RxJS, HTML, CSS/SCSS/SASS

Familiar: React, Vue.js, C#, SQL, Java, Kotlin, Swift, Webpack

Tools & Infrastructure: Git, GitLab CI/CD, Node.js, Jira

WORK EXPERIENCE

Software Engineer | M&T Bank | Buffalo, NY | **July 2022 – Present**

- Executed software solutions, system design, and technical troubleshooting for a premier Angular-based internal bank account management platform used by M&T employees across all branch locations, accelerating legacy application decommissioning.
- Led the enterprise-wide migration of the banking application from Angular v16 to v21, coordinating updates across 8 development teams and managing the deployment timeline with management and Product Owners.
- Produced architecture and design artifacts (including Angular deprecation guides and implementation standards), ensuring consistent, secure adoption of modern patterns across M&T's Employee Guided Servicing organization.
- Strengthened CI/CD infrastructure and application resiliency by upgrading Node.js base images and hardening build pipelines, enforcing security-conscious deployment practices across the full software development lifecycle.
- Wrote and maintained Karma/Jasmine unit tests for new and existing functionality, supporting regression coverage and code reliability across the account management platform.
- Championed technical debt reduction by leading the migration to Standalone Component architecture, transitioning legacy Bootstrap/Angular Material elements to a proprietary in-house design system, implementing Signal-based state management, and updating older conditional logic to modern control flow syntax.
- Assisted in maintaining and evolving a suite of shared Angular libraries and micro-frontends, ensuring consistent functionality and UI parity across multiple internal banking modules.
- Guided junior engineers on front-end best practices, contributing to a software engineering community of practice focused on new and evolving Angular standards.

Technology Intern | M&T Bank | Buffalo, NY | **June 2021 – August 2021**

- Co-developed a proprietary internal document viewer using Angular, delivering over \$1M in annual cost savings by eliminating external licensing fees.
- Collaborated within an Agile team to gather requirements and develop core functionality, ensuring deliverables met bank-level quality and operational standards.

EDUCATION

B.S. in Web and Mobile Computing | Rochester Institute of Technology | Rochester, NY | **August 2017 – May 2022**
